DETAILED ACTION

Vacate office action mailed 7/27/06 in light of rejections set forth below.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim13-20, 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "ion effectors" in claim 23 is a relative term which renders the claim indefinite. The term "ion effectors" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. The specification defines ion effectors as orthovanadate; however, the specification does not define the metes and bounds of the term.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 13-20,23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 13-20,23 are rejected under 35 U.S.C. 112, first paragraph, because

Application/Control Number: 09/781,695 Page 3

Art Unit: 1616

the specification, while being enabling for the instant method / composition comprising a orthovanadate and compound of formula V where R10 is phenyl, does not reasonably provide enablement for invention comprising a method / composition comprising Bengal or tetrazolium redox dye plus a compound of formula I where V is other than phenyl. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make / use the invention commensurate in scope with these claims. R10 is defined as being an aromatic ring or aromatic rings. There are numerous aromatic rings some even having heteroatoms. However, applicant puts forth no examples wherein R10 is heteroaromatic. For this reason on the face it is unbelievable that heteroaromatics would induce production of isoflavones in a plant.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by Ellis et al (Phototropism of Pellia: evidence for mediation by auxin-stimulated acid efflux, J. Plant Physiology, 1985, 121(3),259-64). Ellis teaches a composition comprising ion effectors (sodium orthovanadate) plus 2-(chlorophenoxy)-2-methylpropionic acid, i.e., the instant compound where R10-R11 = 2-chlorophenoxy, R12 = 2-propyl, R13 = H. See abstract.

Claim Rejections - 35 USC § 103

Application/Control Number: 09/781,695

Art Unit: 1616

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 23 is rejected under 35 U.S.C. 103(a) as being unpatentable over Passilly et al (Phosphorylation of peroxisome proliferators-activated receptor alpha in rat fao cells and stimulation by ciprofibrate, Biochemical Pharmaceutical Pharmacology, 1999, 58 no. 6, 1001-1008). Passilly teaches a method of treating rat Fao cells with ciprofibrate [R10 = 4-(2-dichlorocyclopropyl)phenyl, R11 = O, R12 = C (CH3)2, R13 = H] for gene expression. Passilly also teaches the treatment of rat Fao cells with ion effectors (orthrovanadate) for gene expression. Passilly does not disclose a composition comprising both ciprofibrate and orthovanadate. However, it would have been obvious to one having ordinary skill in the art to make a composition comprising both ciprofibrate and orthrovanadate. One would have been motivated to do this since both compounds are employed individually for gene expression in rat cells. See abstract.

Telephonic Inquiry

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alton N. Pryor whose telephone number is 571-272-0621. The examiner can normally be reached on 8:00 a.m. - 4:30 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
